

72 Hour Weather Outlook

Date: September 24th, 2024 (12noon)

**Wednesday
September 25th**

Cloudy, moderate-heavy showers & thunderstorms

Weather Advisory:
Exercise caution

Seas: Slight in open water
0.5m to 1.2m / 1.5ft to 4ft

Marine
Advisory/Warning:
None

**Thursday
September 26th**

Partly cloudy, a few scattered showers & isolated thunderstorms

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.5m / 3ft to 5ft

Marine
Advisory/Warning:
None

**Friday
September 27th**

Occasionally cloudy, scattered showers & thunderstorms

Weather Advisory:
Exercise caution

Seas: Slight in open water
0.5m to 1.2m / 1.5ft to 4ft

Marine Advisory:
Exercise caution...northerly swells

Weather Discussion:

Moisture levels are elevated, with scattered showers across St. Vincent and the Grenadines (SVG). A tropical wave is approaching the island chain and unstable conditions could support pockets of moderate-heavy showers with thunderstorm activity across SVG over the next few days...*Residents and motorists in areas prone to flash-flooding and landslides or near rivers and streams should exercise caution...*Fairly good visibility continues across our area, except for reduced visibility during showers.

Gentle-moderate (15 - 25km/h) breeze across our islands could vary from north-easterly to south-easterly in some locations, decreasing to a light (<10km/h) wind at times.

Sea conditions are slight to moderate in open water, with swells ranging 0.5m - 1.0m west of our islands and up to 1.5m east of our islands...*Small craft operators and sea bathers should exercise caution for northerly swells across SVG during Friday.*

A tropical wave in the eastern Tropical Atlantic Ocean has increasing chance of development and a tropical depression is likely to form in a few days as it moves west-northwestward over the Atlantic Ocean...*The St. Vincent and the Grenadines Meteorological Services will continue to monitor the Tropical Atlantic Ocean and issue updates/advisories as necessary.*
