Less than 1.2m / 4ft

Marine
Advisory/Warning:
None

**Friday
September 6th**

Partly sunny-partly cloudy, chance of isolated showers/thunderstorms

Weather
Advisory/Warning:
None

Seas: Smooth to slight
Less than 1.2m / 4ft

Marine
Advisory/Warning:
None

Weather Discussion:

Moisture levels have decreased across St. Vincent and the Grenadines (SVG), with occasional cloudy skies, a few showers and isolated thunderstorms. Day-time heating, light wind speeds and weak unstable conditions could cause partly sunny skies to become partly cloudy during Thursday and Friday, with a chance of isolated showers/thunderstorms across parts of SVG. Good visibility is expected across our area, with an occasional film of haze noticeable at times.

Gentle-moderate (15 - 25km/h) breeze across our islands could vary between north-easterly and south-easterly in some locations. A reduction in wind speeds (5 - 10km/h) may be noticeable during Thursday and Friday.

Sea conditions are slight to moderate in open water, occasionally appearing smooth with swells near 0.5m west of our islands and ranging 1.0m - 1.5m east of our islands.

Low pressure areas/tropical waves in the Tropical Atlantic Ocean are disorganised, with low-medium chance of development...*The St. Vincent and the Grenadines Meteorological Services will continue to monitor any developments and issue updates/advisories as necessary.*
