slightly hazy, a few
scattered showers

Weather
Advisory/Warning:
None

Seas: Slight to moderate
0.5m to 1.5m/ 1.5ft to 5ft

Marine
Advisory/Warning:
None

Weather Discussion:

As a tropical wave moves away from the islands, periods of light rain and scattered showers with isolated thunderstorms could continue across St. Vincent and the Grenadines (SVG) tonight...**Residents and motorists in areas prone to flooding and landslides or near rivers and streams should remain alert.** Although cloudiness could be decreased across SVG by late Thursday, unstable conditions associated with the Inter-Tropical Convergence Zone (ITCZ) linger across the islands and could support occasional showers during Friday and Saturday. Varying concentrations of Saharan dust continue to create thin film/slight haze across our area, possibly thickening to moderate haze during Thursday night and Friday.

Moderate to occasionally fresh (20 - 30km/h) breeze across our islands, could gust near 40km/h at times and vary in direction between east north-east and south-east.

Marine conditions are slight to moderate with swells ranging 0.5m to 1.5m across our islands.

Forecaster: Joan Mc Donald
