Marine Warning:
*Life-threatening surf & rip
currents*

Seas: Slight to moderate
1.0m to 1.5m /3ft to 5ft

Marine Warning:
*Life-threatening surf & rip
currents*

Weather Discussion:

Fair to partly cloudy skies and isolated showers tonight dawn to partly sunny skies. Overnight Monday, lower-level clouds increase and a few showers move across St. Vincent and the Grenadines (SVG) during Tuesday. A film of haze may be noticeable at times, across our area.

Light-gentle (10 - 15km/h) winds increase to moderate (~25km/h) breeze at times and directions vary between east north-easterly and east south-easterly.

Marine conditions are slight to moderate across our islands, with highest range (1.0m - 1.8m) on Tuesday. However, long period waves propagating towards the island chain could break with life-threatening surf and rip currents along our shores starting Monday morning...*Small-craft operators should secure vessels and sea-bathers are advised to stay out of the water.* Conditions could be more adverse at times of high-tide:

Monday - 2:22 am & 1:12 pm; Tuesday - 3:00 am & 1:52 pm; Wednesday - 3:36 am & 2:35pm

The St. Vincent and the Grenadines Meteorological Services (SVG MET Services) will continue to monitor the Tropical Atlantic Ocean and issue updates/advisories as necessary.
