December 7th**

Cloudy, slightly hazy, a few scattered showers

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.2m to 1.8m /4ft to 6ft

Marine
Advisory/Warning:
None

Weather Discussion:

The Atlantic High Pressure System is the dominant feature, with isolated showers across our islands. A low-level trough is expected to approach the islands during Wednesday with increasing cloudiness across St. Vincent and the Grenadines (SVG). Light rain can be expected Wednesday increasing by evening, with a few showers across SVG by night-fall and scattered showers during Thursday. A thin-film of haze may be noticeable across our area by Tuesday night and slight haze during Thursday.

Moderate-fresh (25 - 35km/h) cooling trades are crossing our islands, occasionally turning east south-easterly and gusting near 40km/h during the night-time. A slight reduction in wind speeds can be expected (20 - 30km/h) during Thursday.

Marine conditions are moderate in open water, with swells peaking near 1.5m on western coasts and near 2.5m on eastern coasts of SVG...*Small craft operators and sea bathers should exercise caution for occasional gusty winds and above normal sea swells.* A fall in swell heights (1.2m - 1.8m) is expected across our islands by Thursday.

Forecaster: Joan Mc Donald
