Be alert-Saharan dust**

**Friday
July 26th**

Partly cloudy, breezy and hazy; low chance of isolated showers

**Weather Advisory
Be alert-Saharan dust**

Seas: moderate
1.5 m to 2.0m / 5ft to 7ft

**Marine advisory
Be alert-Saharan dust**

**Saturday
July 27th**

Partly cloudy to cloudy and breezy; high chance of a few scattered showers

**Weather Advisory
None**

Seas: moderate
1.5 m to 2.0m / 5ft to 7ft

**Marine advisory
None**

Weather Discussion:

A few showers linger over the Grenadines due to a plume of moisture from the south that affected the islands on Tuesday and overnight. A tropical wave is approaching the islands, but most of the shower activity associated with this wave is to the south, nevertheless, scattered showers are forecast tonight. Saharan dust will be present in the atmosphere.

Partly cloudy and hazy conditions are forecast for Thursday, with a few showers possible Thursday night into Friday.

A dry low to mid level atmosphere should result in mostly partly cloudy and hazy conditions on Friday with a low chance of isolated showers.

By Saturday, model guidance indicates instability across the island chain which could trigger a few scattered showers along Saturday. Chance of isolated thunderstorms is low.

Expect brisk winds from the ENE at 15mph-25mph (25km/h-40km/h). Seas will be moderate in open waters with swells peaking at 1.5m on the western coasts, and slightly above 2.0m on the eastern coasts. Brisk winds could result in surface water agitation, and sea bathers and small craft operators are asked to exercise caution.
