December 1st**

Occasionally cloudy & breezy, a few showers

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.5m /3ft to 5ft

Marine
Advisory/Warning:
None

Weather Discussion:

As moisture converges on the southern edge of the Atlantic High Pressure System, a few showers are likely across our islands. Occasionally, patches of low-level clouds could bring light rain and scattered moderate showers across St. Vincent and the Grenadines (SVG) from late Wednesday and during Thursday. Cloud patches and shower activity decrease by Friday afternoon. Saharan dust concentrations across our area is gradually thinning-out and very good visibility is expected by Friday.

Gentle-moderate (15 - 25km/h) east north-easterly trades are crossing our islands, increasing near 30km/h at times during night-time. Occasionally fresh breeze is expected during Friday.

Marine conditions are slight to moderate in open water, with swells peaking near 1.0m on western coasts and near 1.5m on eastern coasts of SVG. A temporary fall (0.5m - 1.2m) in swell heights may be noticeable between Wednesday evening and Thursday evening, with slight conditions.
