Seas: Slight to moderate
1.0m to 1.5m /3ft to 5ft

**Marine
Advisory/Warning:**
None

Seas: Slight to moderate
1.0m to 2.0m /3ft to 6.5ft

Marine Advisory:
Exercise caution

Weather Discussion:

Moisture levels are increasing across St. Vincent and the Grenadines (SVG) due to a trough system/unstable conditions. Mostly cloudy skies, periods of light-moderate rain, moderate-heavy showers and thunderstorms could increase tonight, lingering during Friday and over the weekend. Rainfall accumulations and soil saturation could vary across our islands...*Residents and motorists in areas prone to flooding and landslides or near rivers and streams should be prepared.* Varying concentrations of Saharan dust create a film/slight haze across our area.

Gentle-moderate (15 - 25km/h) north-easterly trades become gusty (~ 35km/h) at times and directions vary between east north-east and east south-east on Friday and during the weekend.

Marine conditions are slight to moderate in open water, with swells ranging 1.0m - 2.0m across our islands...*Exercise caution during Friday and Sunday as gusty winds could agitate seas.*

The St. Vincent and the Grenadines Meteorological Services (SVG MET Services) will continue to monitor tropical developments and issue updates/advisories as necessary.
