### **Advisory # 4 TROPICAL STORM WATCH upgraded to TROPICAL STORM WARNING for ST VINCENT and the GRENADINES (SVG)**

Issued at 2:00 pm, Thursday June 22<sup>nd</sup>, 2023

#### **A Tropical Storm Warning is now in effect for SVG**

This Tropical Storm Warning means that sustained winds of 39 – 73 mph (63 – 118kmh) /tropical storm conditions are expected within our area, within 24hours.

At 2 pm, the center of the Tropical Storm Bret was located near latitude 13.4° North; longitude 58.9° West, or approximately 150 miles (240 kilometers) east of the SVG. The system is moving towards the west at 14 mph (23 km/h) with maximum sustained winds of 65 mph (104 km/h) with higher gusts.

Tropical storm conditions can be expected across the northern-most portion of our islands by tonight. Storm conditions could linger across SVG during Friday. Be Prepared.

#### **A Flash Flood Watch remains in effect for SVG**

Outer bands of Tropical Storm Bret will occasionally affect SVG with moderate/heavy showers, periods of rain, isolated thunderstorms and strong gusty winds. Rainfall accumulations of 3 to 6inches (75 to 150mm) with isolated higher amounts are likely across our islands. A flash-flood watch remains in effect until further notice. **Residents and motorists in areas prone to flooding and landslides or near rivers and streams should be prepared.**

#### **A small-Craft and High Surf Advisory remains in effect for SVG**

Marine conditions are expected to deteriorate this evening with moderate to rough sea swells peaking near 3.5m (11ft), mainly along northern and north-eastern coastlines. A small craft and high surf advisory remains in effect until further notice. **Only vessels capable of withstanding these swells should venture out. Small-craft should remain in port. Sea-bathers are also advised to stay out of the water.**
