

A FLASH-FLOOD WATCH IS IN EFFECT FOR ST. VINCENT & THE GRENADINES

Issued: 6:00 pm Wednesday, 27th November, 2024

Occasional pockets of moderate showers and isolated thunderstorms are anticipated across St Vincent and the Grenadines as unstable conditions affect our islands. Model guidance suggests conditions could intensify along Thursday and rainfall accumulations of 50-75mm (approximately 2-3 inches) with isolated higher amounts in mountainous areas are possible during the next 24 hours.

The weather advisory which is already in effect for St. Vincent & the Grenadines has been upgraded to a flash-flood watch and will remain in effect until 6:00 pm Thursday 28th, November 2024.

Residents and motorists in areas prone to flooding and landslides or near rivers and streams should be prepared.

A Flood-Watch is issued when conditions are favourable and there exists the possibility of flooding during the watch period.

This flash-flood watch may be upgraded to a warning if conditions warrant.
