

72 Hour Weather Outlook

Date: December 1st, 2025 (6 pm)

Tuesday
December 2nd

Occasionally cloudy with showers

Wednesday
December 3rd

Cloudy with moderate to heavy showers and thunderstorms

Thursday
December 4th

Partly cloudy with light to moderate showers

Weather Advisory/Warning:
None

Seas: slight to moderate
1.0 to 1.5 m / 3.0 to 5.0ft

Weather Advisory:
Be Prepared

Seas: Moderate
1.5 to 2.0m / 5.0 to 7.0ft

Marine Advisory/Warning:
None

Seas: Moderate
1.5 to 2.0m / 5.0 to 7.0ft

Marine Advisory/Warning:
None

Marine Advisory:
Exercise caution

Marine Advisory:
Exercise caution

Weather Discussion:

Weak unstable conditions ahead of a low-level trough are likely to produce occasional showers across St. Vincent and the Grenadines (SVG) over the next 36 hours. However, by late Tuesday, model guidance suggests a deterioration in weather conditions due to a more favorable mid to upper level atmosphere. As a result, shower activity is expected to increase in frequency and intensity, with pockets of heavy showers and thunderstorms anticipated into late Wednesday. Advisories may be issued for SVG. Improved weather, with only a few showers, should return by Thursday.

15-25km/h easterly to east-northeasterly winds will persist across the islands, becoming strong (~40km/h) with higher gusts by midweek, and shifting east-southeasterly. Seas are slight to moderate in open waters, with swells peaking near 1.0m on the western coast and 1.5m on the eastern coasts. Gusty winds could agitate seas from Tuesday night, resulting in deteriorating sea conditions. **Small-craft operators and sea bathers should exercise extreme caution for above normal swells and occasional gusty winds.**
