Marine Advisory
Exercise caution

Weather Advisory/Warning
None

Seas: moderate
1.5 m to 2.0m / 5ft to 7ft

Marine Advisory
Exercise caution

Weather Discussion:

Skies should become progressively cloudy into Thursday night as a low-level trough approaches our islands. Pockets of light to moderate showers are anticipated across SVG along Friday. Residents should remain alert. Lingering instability should allow for a few showers early Saturday, while relatively fair conditions are expected on Sunday. Breezy conditions will persist in our area during this weekend.

Gentle to moderate (~15-25 km/h) easterly to east north easterly trades are crossing our islands. An increase (25-35 km/h) in speeds is expected from Friday with an occasional east south easterly wind flow in the upcoming days. Seas are moderate in open waters with swells ranging between 1.5m to 2.4m. Small craft operators and sea bathers should exercise caution for above normal sea swells and occasional gusty winds. Saharan dust haze intrusion is expected around Saturday, reducing air quality and visibility across our islands.
