

72 Hour Weather Outlook

Date: July 13th, 2026 (12 Noon)

**Tuesday
July 14th**

Fair to partly cloudy
hazy and breezy with a
few showers

Weather Advisory
*Take necessary precaution
due to Saharan dust haze*

Seas: slight to moderate
1.2 m to 2.0m / 4ft to 7ft

Marine Advisory
Exercise caution

**Wednesday
July 15th**

Fair to occasionally
cloudy and breezy at
times with a few
showers

Weather Advisory/Warning
None

Seas: slight to moderate
1.2 m to 1.8m / 4ft to 6ft

Marine Advisory
Exercise caution

**Thursday
July 16th**

Fair to partly cloudy with
a few isolated showers

Weather Advisory/Warning
None

Seas: slight to moderate
1.0 m to 1.8m / 3ft to 6ft

Marine Advisory/Warning
None

Weather Discussion:

A plume of Saharan dust is crossing our islands, reducing visibility and air quality. **Residents are advised to take necessary precautions.** A gradual thinning out is expected as Wednesday progresses. The weather within the next few days should be relatively fair with brief interruptions of the occasional light shower. This is due to the dominance of the Atlantic High Pressure System across the Eastern Caribbean.

Moderate to fresh (~20-35 km/h) east south easterly trades are crossing our islands. A shift to east north easterly is expected from Tuesday with a slight decrease (~30 km/h) expected on Wednesday. Consequently, seas are moderate in open water with swells peaking near 1.5 m on western coasts and near 2.0 m on eastern coasts. **Small craft operators and sea bathers should exercise extreme caution for above normal sea swells and occasional gusty winds and reduced visibility in Saharan dust haze.**
