

# 72 Hour Weather Outlook

Date: November 24<sup>th</sup>, 2025 (12 Noon)

**Tuesday  
November 25<sup>th</sup>**

Partly cloudy to cloudy, hazy and breezy with isolated showers

Weather Advisory/Warning  
None

Seas: slight to moderate  
1.2 m to 2.0m / 4ft to 7ft

Marine Advisory  
Exercise caution

**Wednesday  
November 26<sup>th</sup>**

Partly cloudy to cloudy and breezy at times with a few isolated showers

Weather Advisory/Warning  
None

Seas: moderate  
1.5 m to 2.0m / 5ft to 7ft

Marine Advisory  
Exercise caution

**Thursday  
November 27<sup>th</sup>**

Occasionally cloudy and breezy with a few showers

Weather Advisory/Warning  
None

Seas: moderate  
1.5 m to 2.0m / 5ft to 7ft

Marine Advisory  
Exercise caution

## Weather Discussion:

As patches of moisture continue to cross our islands, occasional cloudy skies will persist during the next few days. The upper level environment will provide some occasional support and trigger pockets of moderate showers into midweek. In addition, Saharan dust haze concentrations should thicken by Tuesday, further reducing visibility and air quality across our islands. Some thinning out is expected on Wednesday.

Moderate (~20-30 km/h) north easterly to east north easterly trades are crossing our islands with gusts near shower activity. Occasional increase (~25-35 km/h) in speeds will occur near nightfall and along Thursday this week. Seas are slight to moderate in open waters with swells peaking at 1.0m on the western coasts and near 2.0 m on the eastern coasts. **Marine users should exercise caution for above normal sea wells especially on eastern coasts as occasional gusts agitate sea conditions.**
