Weather Discussion:

Unstable conditions will allow for a few showers under occasionally cloudy skies for the remainder of Sunday and along Monday. On Tuesday, the Atlantic high pressure system should dominate, allowing for relatively fair conditions. By midweek, weak pulses could trigger a few isolated showers across the island chain.

Moderate to fresh (~20 to 30km/h) east north easterly trades are crossing our islands, slightly increasing (~35 km/h) by Tuesday. Seas are slight to moderate in open water with swells peaking at 1.0m on the western coasts and around 1.5 m on the eastern coasts. Swell heights could rise by Tuesday resulting in moderate sea conditions. **Marine users should exercise caution for above normal sea swells.** Saharan dust haze concentrations are anticipated from Tuesday, reducing air quality and visibility across our islands
