Marine Warning:
Above normal swells & gusty winds

Seas: Moderate to rough
1.5m to 2.7m / 5ft to 9ft

Marine Warning :
Above normal swells & gusty winds

Weather Discussion:

The Atlantic High Pressure System is the dominant feature, with stable conditions across the islands. Occasionally, fresh breeze could push shallow clouds with a few brief showers across St. Vincent and the Grenadines (SVG). Patches of Saharan dust could occasionally create a film/slight-haze across our area.

Moderate-fresh (25 - 35km/h) breeze across SVG could become gusty at times (~ 40km/h), with directions varying between north-east and east southeast in some locations...*Be aware of occasional strong winds!*

Sea conditions are currently slight to moderate in open water, ranging 1.2m(4ft) to 2.0m(6.5ft) across our islands. Occasional gusty winds could result in rising swells, ranging 1.5m(5ft) to 2.7m(9ft) by Friday...*Small-craft operators should be prepared for rising swells and occasional gusty winds...Small-Craft & High-Surf Advisory remains in effect for SVG.*
