Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.2m to 2.0m / 4ft to 6.5ft

Marine
Advisory/Warning:
None

Weather Discussion:

Weak unstable conditions are crossing the islands, with occasional shallow clouds bringing a few showers across St. Vincent and the Grenadines (SVG). Patches of Saharan dust could create slight-haze across our area at times.

The Atlantic High Pressure System continues to push fresh-occasionally strong (30 - 40km/h) cool breeze across our islands and wind directions vary from north-easterly to east southeasterly in some locations. A gradual reduction in wind speeds can be expected by Monday, becoming moderate (20 - 25km/h) across SVG.

Sea conditions are currently moderate-rough in open water, near 1.5m(5ft) west of our islands and ranging 2.0m(6.5ft) to 3.0m(10ft) east of our islands...*Small-Craft & High-Surf Advisory remain in effect for SVG, until 6am Monday 15th December 2025.* Swell heights are expected to gradually fall with slight-moderate sea conditions across SVG by Tuesday.
