Advisory/Warning:
None

Seas: Moderate in open water
1.5m to 2.0m /5ft to 6.5ft

Marine Advisory:
*Occasional gusty winds,
northerly swells
& rip currents*

Weather Discussion:

Weak unstable conditions are expected across the islands by Monday evening, with a few scattered showers across St. Vincent and the Grenadines (SVG). Saharan dust concentrations vary in intensity and create a film/slight-haze across our area at times.

Gentle-moderate (15 - 25km/h) winds continue across our islands and directions could vary from northeast to southeast in some locations. Wind speeds are expected to gradually increase with cool fresh (30 - 35km/h) breeze by mid-week.

Sea conditions are slight to moderate in open water across SVG. Heights are expected to rise with occasional northerly swells ranging 1.0m(3ft) to 1.5m(5ft) west of our islands and up to 2.0m(6.5ft) east of our islands...*Small-craft operators and sea-bathers should exercise caution for occasional northerly swells, breaking wave action and rip currents.*
