& slight-haze

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 2.0m /3ft to 6.5ft

Marine Advisory:
*Above normal swells &
occasional gusty winds*

Weather Discussion:

Shallow clouds converging on the southwestern edge of the Atlantic High Pressure System could bring a few isolated showers across St. Vincent and the Grenadines (SVG). Cloud-cover and showers could increase across SVG, by Tuesday. Saharan dust concentrations are likely to create slight/moderate-haze across our area during Monday.

Moderate-fresh (25 - 35km/h) northeasterly breeze across our islands could occasionally peak (40 - 45km/h) during tonight/early Sunday...*Be aware of occasional strong winds!*

Swells are expected to rise overnight due to occasional strong winds, with swells ranging 1.0m (3ft) to 1.5m (5ft) west of our islands and 1.8m (6ft) to 2.5m (8ft) east of our islands...*Small-craft operators and sea-bathers should exercise caution for above normal swells and gusty winds, especially tonight and early Sunday.*
