Weather  
Advisory/Warning:  
*None*

Seas: Slight to moderate  
1.0m to 1.8m /3ft to 6ft

Marine  
Advisory/Warning:  
*None*

## Weather Discussion:

On the southwestern edge of the Atlantic High Pressure System, a few/isolated showers occasionally converge across St. Vincent and the Grenadines (SVG). Cloud-cover and shower activity could increase across SVG during Thursday night. A film/slight-haze may be noticeable across our area at times.

Moderate-fresh (20 - 35km/h) breeze could vary in direction from northeast to easterly and east southeasterly in some locations. Wind speeds across our islands are expected to gradually decrease, with moderate (20 - 25km/h) breeze during Wednesday and Thursday.

Sea conditions are moderate in open water, with swells ranging 1.0m (3ft) to 1.5m (5ft) west of our islands and up to 2.5m (8ft) east of our islands...*Small-craft operators and sea-bathers should continue to exercise caution for above normal swells and occasional gusty winds.* Swell heights are expected to gradually fall, ranging 1.0m (3ft) to 1.5m (5ft) across SVG, by Thursday evening.
