January 8th**

Fair-partly cloudy,
brief isolated showers
& a film/slight-haze

Weather
Advisory/Warning:
None

Seas: Slight to moderate
0.5m to 1.5m / 1.5ft to 5ft

Marine Advisory:
*Occasional northerly swells
& rip currents*

Weather Discussion:

Stable conditions persists for a few more days, with few shallow clouds and a chance of brief/isolated showers across St. Vincent and the Grenadines (SVG). Good visibility could be reduced during Wednesday, as a film/slight-haze crosses our area.

Light-gentle (5 - 15km/h) cool breeze continues across our islands, gradually increasing to moderate (20 - 25km/h) during by Wednesday. Wind directions could vary from northeast to east southeast in some locations.

Sea conditions are currently slight in open water, with swells ranging 0.5m (1.5ft) to 1.0m (3ft) west of our islands and near 1.2m (4ft) east of our islands. However, northeasterly long period waves could increase breaking wave action and rip currents along eastern coasts of St. Vincent by Tuesday evening, spreading across SVG during Tuesday night...*Small-craft operators and sea-bathers should exercise extreme caution.*
