breezy at times, chance
of isolated showers &
slight/moderate-haze

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.8m / 3ft to 6ft

Marine
Advisory/Warning:
None

Weather Discussion:

The Atlantic High Pressure System is the dominant feature, pushing moderate-fresh (25 - 35km/h) north-easterly trades across the islands, with a possible surge (~ 40km/h) during Friday (to)night. A few showers are likely across St. Vincent and the Grenadines (SVG) over the weekend. Patches of Saharan dust could occasionally create slight/moderate-haze, reducing visibility and air quality across our area... *Take the necessary precautions.*

Sea conditions are slight to moderate in open water, with swells ranging 1.0m(3ft) to 1.5m (5ft) west of our islands and 1.8m (6ft) to 2.5m (8ft) east of our islands... *Small-craft operators and sea-bathers should exercise caution for rising (above normal) swells and gusty winds especially during Friday (to)night and Saturday morning.*

The St. Vincent and the Grenadines Meteorological Services will continue to monitor developments in the Tropical Atlantic Ocean and issue updates/advisories as necessary.
