flash-flooding &
occasional strong winds*

Seas: Moderate in open water
1.5m to 2.5m / 5ft to 8ft

Marine Advisory:
*Exercise caution for
above normal swells &
occasional strong winds*

Weather Discussion:

Weak unstable conditions are crossing our islands and a patch of Saharan dust could reduce visibility and air quality with moderate-haze during Monday night and Tuesday...*Take the necessary precautions.* Late Tuesday and early Wednesday, moderate-heavy showers with thunderstorms are likely across St. Vincent and the Grenadines (SVG)...*Be alert.*

Gentle (~ 15km/h) breeze across SVG is expected to gradually increase over the next few days with winds surging (35 - 40km/h) during Wednesday...*Be aware of occasional strong winds.* Wind directions could vary between northeast and southeast in some locations.

Sea conditions are smooth-slight with swells less than 1.2m(4ft) across our islands. Gradual increase in wind speeds could result in rising swell heights, nearing 1.5m(5ft) west of our islands and 2.5m(8ft) east of our islands during Wednesday...*Small-craft operators and sea-bathers should exercise caution for rising swells and occasional strong winds.*
