*Exercise caution for possible
flash-flooding*

Seas: Moderate in open water
1.5m to 2.5m/5ft to 8ft

Marine Advisory:
Exercise caution for above normal swells & occasional gusty winds

Weather Discussion:

A couple tropical waves are bringing cloudy skies, gusty winds, moderate-heavy showers and thunderstorms across St. Vincent and the Grenadines (SVG) by this afternoon into early Thursday and again by late Friday...*Residents and motorists in areas prone to flash-flooding and landslides or near rivers and streams should exercise caution.* Saharan dust concentrations thinned out across our area, thickening again Thursday night with limited visibility and unhealthy air quality for sensitive persons...*Take the necessary precautions.*

Fresh (30 - 35km/h) northeasterlies could become occasionally strong (40 - 45km/h) with gusty conditions over the next few days...*Be aware of occasional strong winds!*

Seas across SVG could become moderate-rough, with swells ranging 1.5m(5ft) to 1.8m(6ft) west of our islands and 2.5m(8ft) to 3.0m(10ft) east of our islands...*Small-craft Advisory in effect for SVG from 12noon today Wednesday until 12noon Thursday and may be extended or discontinued if conditions warrant.* Sea-bathers are advised to stay out of the water.
