## Weather Discussion:

Dry conditions persist across St. Vincent and the Grenadines (SVG) today and a film/slight-haze may be noticeable across our area at times. However, occasional shallow clouds with a few/isolated showers are likely to interrupt fair skies. By mid-week, a weak tropical wave could increase the chance for showers across SVG.

The Atlantic High Pressure System continues to push moderate-fresh (20 - 35km/h) breeze across our islands, varying in direction between northeast and east southeast.

Sea conditions are slight-moderate in open water, with swell heights near 1.0m(3ft) west of our islands and 1.5m(5ft) east of our islands.
