## Weather Discussion:

Saharan dust concentrations are creating slight/moderate-haze across our area and fair-partly cloudy skies could trigger isolated showers across Vincent and the Grenadines (SVG). Hazy conditions across SVG are expected to thin-out by weekend.

Gentle-moderate (15 - 25km/h) breeze crossing our islands could vary in direction between northeasterly and easterly. An occasional decrease (~10km/h) in wind speeds over the next few days, could result in little cooling-effect and warm conditions.

Sea conditions are currently slight-moderate in open water, with swell heights ranging 0.5m(1.5ft) to 1.0m(3ft) west of our islands and 1.2m(4ft) to 1.5m(5ft) east of our islands.
