a few/isolated
showers

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.8m / 3ft to 6ft

Marine Advisory:
*Northerly swells &
occasional rip currents*

Weather Discussion:

Weak unstable conditions linger across the islands, with occasional cloud patches bringing a few showers and a chance of isolated thunderstorms across St. Vincent and the Grenadines (SVG).

The St. Vincent and the Grenadines Meteorological Services (SVG MET Services) will continue to monitor the Tropical Atlantic Ocean and issue updates/advisories as necessary.

Gentle-moderate (10 - 20km/h) breeze could become light at times, with little cooling effect and directions may vary between northeast and southeast in some locations.

Sea conditions are slight in open water, with swells less than 1.2m(4ft) across of our islands. Northerly swells are likely along western coasts of SVG by Friday evening and a gradual rise in swell heights can be expected over the weekend. Northerly swells could near {1.0m(3ft)} west of our islands and {1.8m(6ft)} east of our islands by Sunday, with occasional rip currents...*Small-craft operators and sea-bathers should exercise caution...*
