

St. Vincent and the Grenadines Meteorological Services

Argyle International Airport

The Government of St. Vincent & the Grenadines

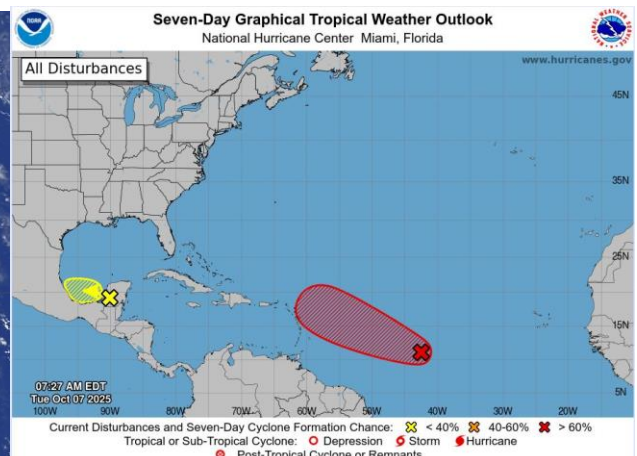

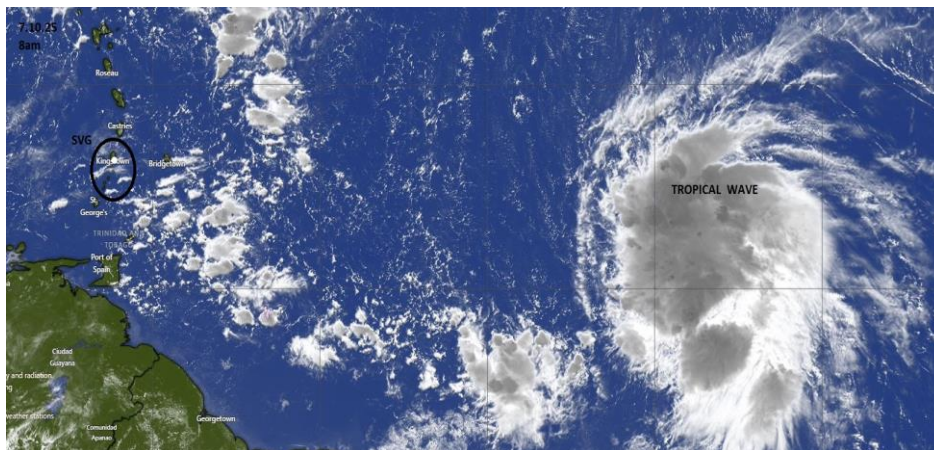

WEATHER INFORMATION STATEMENT

Issued: 8:00 am Tuesday, 7th October, 2025.

The St. Vincent and the Grenadines Meteorological Services is monitoring an area of low pressure near 11°N 40.5°W; a little more than 1000 miles east of the Windward Islands associated with tropical wave. Showers and thunderstorm activity associated with this wave continues to show signs of improved organization and environmental conditions appear favorable for continued development of this system. A tropical depression or storm is likely to form in the next day or so while it moves quickly west-northwestward across the central tropical Atlantic. In addition, this system has a high chance (90%) of tropical development in the next 48 hours and is expected to be near or north of the northern Leeward Islands on Thursday and Friday.

All residents are advised to keep informed on the progress of this systems and pay close attention to information being issued by the St. Vincent and the Grenadines Meteorological Services by visiting, <http://www.meteo.gov.vc/> or by following us on Facebook via, <https://facebook.com/svgweather>

THERE ARE NO WATCHS OR WARNINGS IN EFFECT FOR ST. VINCENT AND THE GRENADINES AT THIS TIME.
