Weather
Advisory/warning:
None

Seas: slight to moderate
1.0m to 1.5m / 3ft to 5ft

Marine
Advisory/Warning:
None

Weather Discussion:

Instability will move over the Southern Grenadines tonight, while dry air will continue to be elsewhere. Fair to partly cloudy skies are forecast for Sunday and Monday with the chance of showers increasing from Tuesday. Winds will blow generally from the east at 15km/h to 30km/h, but an east south east (ESE) wind flow can be expected around Sunday night. Seas will be slight to moderate in open waters with swells ranging between 1.0m-1.5m. Haze intrusion is forecast for around Tuesday.

A strong tropical wave located in the eastern Atlantic is moving westward at 24 to 32 km/h (15 to 20 mph) and continues to show signs of development. Currently, model guidance indicates that it will pass to the north of SVG sometime around Thursday/Friday. SVG MET Services will continue to monitor this disturbance and provide the necessary updates.
