

**WEATHER INFORMATION STATEMENT
TWO (2) FOR SAINT VINCENT AND THE GRENADINES**

Issued at 8:00 am, Saturday 22nd July, 2023

The St. Vincent and the Grenadines Meteorological Services continues to closely monitor an area of low pressure located near latitude 12° North, longitude 42° West, or about 1310 miles (2108 kilometers) east of SVG. This system is moving westward at 12 mph or 19 Km/h. The latest forecast model guidance suggests that some slow development is possible over the next few days and there is a medium chance (60%) of tropical cyclone formation in the next 7 days.

Regardless of development, heavy showers, thunderstorm activity and gusty winds are likely across SVG from the early to the middle part of next week. Residents are strongly advised to keep informed on the progress of this system.
